

## Services & Investment

Since 2015, I have been honing my skills as a videographer, dedicating myself to providing professional services that cater to my clients' unique needs. Before committing to any event, I prioritise open communication by engaging in a call with either the client or the wedding planner. This allows me to gain a comprehensive understanding of the project at hand. During this brief interview, I delve into various aspects such as the location, number of guests, time constraints, and budgetary considerations. By gathering these essential details, I am able to offer the most competitive pricing for potential clients.

To secure my services as your trusted videographer for your special occasion, a 30% booking fee of the agreed-upon price is required. This not only guarantees your reservation but also ensures that a contract is put in place, solidifying our mutual commitment.

To facilitate the payment process, the total fee will be divided into three instalments. The final payment will be due one month prior to the event, allowing ample time for both parties to prepare accordingly.

My price range is from 2.300 - 5.900 euro on services that covers 99% of the events,  
plus many extra services you can choose.

(the price for videography services is typically determined by several factors.

These factors can vary depending on the videographer and the specific requirements of the event.)
