

# Live Wedding Painting

Live event painting is a specialty service where a fine artist paints the scene around them as it unfolds. This requires a painter who is extremely fast, makes quick decisions, and is comfortable with an engaged audience. Live painting is so unique because it allows the artist to take in all the senses of your special day and translate them to canvas. With an understanding of your overall vision and attention to detail as the event is happening, I will create a piece of art that you will treasure for years to come!
